

## **NACEX prioritises the safety of its activity**

**NACEX has acquired o-zone generators in order to disinfect its vehicles efficiently and effectively.**

**Barcelona, the 14<sup>th</sup> of April 2020.** NACEX, the Logista's express parcel and documentation delivery firm, continues to put new security measures in place in order to guarantee the safety of its activity. The company has recently acquired o-zone generators that are being used to disinfect its installations and vehicles efficiently and effectively. By doing so, NACEX is contributing to the health and safety of its collaborators and clients, avoiding the spread of the coronavirus.

The disinfection points have been placed in the NACEX hubs; from where the service is provided to all of the company's hubs, as well as to the franchise office vehicles that request it.

This initiative adds to the others NACEX has implemented in its quest to guarantee the safety of its activity, such as deliveries via 'Zero Contact', so that the client does not have to sign for receiving a shipment, office personnel teleworking from home for processes that allow so, or the activation of a Contingency Plan for the health and safety of its employees.

### **The Company**

NACEX has a wide range of services available and forms part of Logista, the leading distributor of products and services to local retailers in the South of Europe.

NACEX has a fleet of over 1,600 vehicles and more than 3,000 collaborators, as well as a network of 31 hubs and over 300 franchise offices in Spain, Portugal and Andorra.
